

AI Study Assistant - Flashcards

Question: What is a primary weakness of Subspace.money identified for first-time users?

Answer: Unclear product positioning and feature overload without proper onboarding.

Question: How does the current checkout flow for Subspace.money introduce conversion friction?

Answer: It requires users to first add money to their wallet before completing a purchase, adding extra steps.

Question: What is the proposed solution to reduce checkout abandonment on Subspace.money?

Answer: Offer direct payment options such as UPI, Cards, and Net Banking, while keeping the wallet as an option.

Question: What problem does the Subspace.money chat feature currently face?

Answer: It lacks context, and first-time users don't understand its purpose, value, or how it supports subscriptions.

Question: How can Subspace.money improve its chat feature to increase engagement?

Answer: Tie chat directly to subscription sharing and group purchases (e.g., creating sharing groups, coordinating purchases).

Question: What opportunity do "empty states" miss on the Subspace.money platform?

Answer: They fail to educate users or guide them towards the next action, instead simply indicating that nothing is there.

Question: Give an example of how an empty state could be improved on Subspace.money for "My Subscriptions".

Answer: Instead of just "No Active Subscriptions," it could say: "Browse popular subscriptions and start saving with group buys."

Question: What is a key issue with user profile completion on Subspace.money?

Answer: Users have little motivation to complete their profile information because there's no indication of how it benefits them.

Question: How can Subspace.money encourage users to complete their profiles?

Answer: Introduce a profile completion system showing progress (e.g., "Profile Completion: 40%") and listing benefits of a complete profile.

Question: According to the conclusion, what are the top 3 highest-impact improvements for Subspace.money?

Answer: 1. Clarifying the product value proposition. ■ 2. Simplifying checkout. ■ 3. Making social features more intuitive.
